Education

BS **Korea University**, Artificial Intelligence, Minor in Mathematics — Seoul, South Korea, Mar 2025 – present

HS **Gangwon Science High School**, Science — Gangwon, South Korea, Feb 2024

Experience

VIKA, CTO — Seoul, South Korea, 2026 – present, 1 year
Pre-startup team; leads product development.

MOYEO, Freelance Frontend Developer — Remote, 2026
A location-based mobile web service for finding, hosting and joining meetups nearby, with map search and group chat. Built the frontend with Next.js and TypeScript.

Projects

Syllo — 2026 – present
A study workspace that brings LMS courses, assignments and lecture files into one daily view, with notes beside the materials.

LOLBOB — 2026
Deals three restaurant cards that match your budget, cuisine and campus, so friends can decide where to eat.

Draw-Go! — 2026
A quick browser game for game-queue waits; doodle a character, then run, swim and fly with it.

Motive! — 2026
A canvas that turns scattered ideas into a buildable plan. Grand prize at GDGKU BYPP Hackathon.
