Education

BS **Korea University**, Artificial Intelligence, Minor in Mathematics — Seoul, South Korea, Mar 2025 – present

HS **Gangwon Science High School**, Science — Gangwon-Do, South Korea, Feb 2024

Research & Professional Experience

VIKA, CTO — Seoul, South Korea, 2026 – present
Pre-startup team; leads product development. Developed an automated pipeline for classifying medical procedure data using the Meta API.

MOYEO, Freelance Frontend Developer — Remote, 2026
A location-based mobile web service for finding, hosting and joining meetups nearby, with map search and group chat.

Selected projects

Syllo — 2026 – present
A study workspace that brings LMS courses, assignments and lecture files into one daily view, with notes beside the materials.

Draw-Go! — 2026
A quick browser game for game-queue waits; doodle a character, then run, swim and fly with it.

Motive! — 2026
A canvas that turns scattered ideas into a buildable plan. Grand prize at GDGKU BYPP Hackathon.

EXAONE-4.0 1.2B Compression, LG Aimers 8th Cohort — 2026
Team project compressing LG AI Research's EXAONE-4.0 1.2B LLM while preserving benchmark quality. 2nd place in the final round.

- Final model applies Wanda pruning (10% sparsity) followed by GPTQ FP8 quantization with llm-compressor
- Compared W8A8, W4A16 and FP8 schemes, and analysed how calibration data and seeds affect quantization error

Arithmetic Transformer, 3rd InThon Datathon — 2025
Team project training a Transformer from scratch to compute large-number arithmetic (e.g. 12-digit × 11-digit multiplication). Gold prize.

- Compared RoPE and ALiBi positional encodings for digit-level generalization
- Reversed the answer digits so the model writes from the ones place, following how carries propagate

Honors & Awards

- 2nd Place (Final Round), LG Aimers 8th Cohort (2026)
- Excellence Award, 2026 Blockchain & AI Hackathon (2026)
- Grand Prize, GDGKU BYPP Hackathon (2026)
- Silver Prize, 1st SKYSH Hackathon (2026)
- Selected, Gangwon Future Talent (2026)
- Gold Prize, 3rd InThon Datathon, Korea University College of Informatics (2025)

Leadership & Activities

Korea University Department of Artificial Intelligence Student Council — Seoul, South Korea
2025 – present

- President, Student Council (2025 – Present)
- Lead, Korea University Task Force for "Inyeon," an Inter-University AI Event (2026)
- Chair, Bylaws Revision Committee (2026)
- Member, Career and Academic Affairs Bureau (2025)
- Member, Admissions Interview Support Task Force (2025)

Korea University College of Informatics Student Council — Seoul, South Korea
2026 – present

- Frontend Developer, Development Task Force
- Chair, Finance Management Committee
- Chair, Student Space Management Committee
- Member, Bylaws Revision Committee
- Member, NewbieThon Organizing Committee

Google Developer Group on KU (GDGKU) — Seoul, South Korea
2025 – present

- Academic Team

AIKU, Korea University Deep Learning Society — Seoul, South Korea
2025 – present

- External Relations

NewLearn, Korea University Neuroscience Society — Seoul, South Korea
2025

- External Affairs

Skills

Languages: Python, JavaScript, TypeScript, C, C++

Web: Next.js, React, Cloudflare

AI: Computer Vision, LLM compression and quantization, Pytorch, Codex, Claude Code
